Service Bulletin

TCS - Titan Control Software v3.3.0

Applicability: This new release is recommended for all Titan product users.

Description: Titan Control Software version 3.3.0 incorporates the following feature enhancements and bug fixes:

1. Added high precision HDF5 export option ('HDF5HP') supporting high precision location data
2. Implemented Demo Mode (simulated data input)
3. Improved the FFT Review window on the Export screen
4. Corrected a calibration issue with digital gains (256 & 512) when CAL+ or CAL- was enabled
5. Implemented Help link function key [F12] on the Configuration and Export screens

TCS v3.3.0 is available as an *Installer* that includes all required support files as well as an update to the embedded User Manual that provides context-sensitive help.

Update: Download TCS v3.3.0 from the Mars Labs Knowledge Base:
