Service Bulletin

TCS - Titan Control Software v3.3.3

Applicability: This new release is recommended for all TCS users.

Description: Titan Control Software version 3.3.3 incorporates the following feature enhancements and bug fixes:

1. Implemented a File Renaming feature that allows renamed files to be read and displayed in TCS.
2. Added serial data rate support for CAI Mini-Recorders.
3. Added a lockout with message if more than one device selects a Digital Pod.
4. When enabled, CPU Monitor Mode is highlighted in yellow with a message indicating that modules are no longer synchronized by the CPU clock.
5. Implemented a prototype WFT-based speed on the In-Vehicle Display targeting an averaged speed from all four wheels at a 5Hz update rate.

TCS v3.3.3 is available as an *Installer* that includes all required support files as well as an update to the embedded User Manual that provides context-sensitive help.
