Service Bulletin

TCS - Titan Control Software v3.3.5

Applicability: This new release is recommended for all TCS users.

Description: Titan Control Software version 3.3.5 incorporates the following feature enhancements and bug fixes:

1. Added 'Concatenated Recording' option on the Recordings & Triggers screen.
2. Added Single Channel Export option ('Select on Export').
3. Added 'Auto-Start' option on the Device Configuration screen.
4. Updated the IMU Euler Angle display
5. Changed the Displacement Sensor default condition to Input Dividers OFF
6. Implemented Helper Icons (provides help on specific topics)
7. Modified the In-Vehicle Display panel to improve readability on small screens

TCS v3.3.5 is available as an *Installer* that includes all required support files as well as an update to the embedded User Manual that provides context-sensitive help.

Update: Download TCS v3.3.5 from the Mars Labs Knowledge Base:
