

SPECIAL OFFER ON TRAINING SESSIONS

For a limited Time, Mars Labs is offering no-cost data acquisition (DAQ) training sessions tailored to your company's testing requirements. This training is being offered online as a 1-2 hour session with an emphasis on the type of testing used at your facility. Training will be conducted by Mars Labs' President and Technical Director Mr. Ernie Falcone, a recognized DAQ subject matter expert. Ernie will be using Mars Labs' Titan Training Guide as the base reference training material, and a copy of the training guide will be made available to session participants in PDF form (see the Training Guide Table of Contents below).

Titan Training Guide

- Introduction

- Overview of Titan

- The Testing Process

- Classes of Sensors (technology and electrical configuration)

- Hardware Signal Flow for a Titan Input Module

- Sensor Interface

- Test Fixtures for Demonstration

- Sensor Configurations

- The Titan Input Module

- Titan Control Software (TCS) – Installation

- Configuring TCS

- General Guidelines and Precautions

- Additional Resources

Please contact Mars Labs at sales@marslabs.com to arrange an online training session.
