

## Titan CMX USB Expander

### Key Features:

- Expands the channel count of the Titan CML04 USB Channel Expander by providing four additional RJ45 COMM link connections for Titan Input Modules (provides up to an additional 64 channels)
- Multiple Expanders can be used to configure large channel-count systems (see figure below)
- Provides power, communication, and sync on all RJ45 connections
- Isolated power supply
- Compact size and low weight make the CMX04 suitable for in-vehicle applications

### Specifications:

#### Supported Sample Rates\*:

- With Titan 'C' series modules: Up to 25K samples/second
- With Titan 'B' series modules: Up to 10K samples/second

\* Mixed system configurations (Titan series B modules + Titan series C modules) are not supported

**Power Requirements** 11 - 32 VDC

**Dimensions / Weight** 13.3 cm x 10.6 cm x 4.0 cm (L x W x H) / 300g
